EDUCATION

Georgia Institute of Technology

Atlanta, GA

Bachelor of Science

May 2027

Major in Computer Science; Threads: Cybersecurity and Information Internetworks

Cumulative GPA: 3.75/4.0

Relevant Coursework: Data Structures and Algorithms, Design and Analysis of Algorithms, Intro to AI, Systems and Networks

Technical Skills: Proficient in Java, Python, C, forms of Assembly. Familiar with HTML and CSS, Experience with Unity, Godot, Android Studio. NumPy, PyTorch, Scikit, Pandas. Unix and Linux.

WORK EXPERIENCE

RESIDENT ASSISTANT

Atlanta, GA

Georgia Tech First-Year RA

August 2025 – Present

- Served a community of 500 residents, fostering a safe environment through programming, collaboration with co-RA, and passive initiatives.
- Mediated peer conflicts and provided resources to residents while also fostering a positive relationship.
- Collaborated with a team of 18 RAs and a Hall Director to coordinate building-wide events and create a welcoming environment.

VOLLEYBALL SCOREKEEPER (Immaculate Heart of Mary School)

Atlanta, GA

Lead Scorekeeper

Spring 2021 – Spring 2024

- Upheld volleyball rules by communicating between players, coaches, and referees for 150+ hours and 140+ games.
- Oversaw the gym by taking down and putting up the net each weekend, administering minor first aid, maintaining cleanliness, and leading both teams in gym protocol.

PROGRAMMING PROJECTS

CURRENT CRISIS: GAMING FOR POWER GRIDS (C#, MagicaVoxel)

January 2026-Present

- Developed graphics and gameplay features in Unity using C# for an educational game focused on fire risks in electric power grids.
- Collaborated with a team using GitHub for version control to integrate visual assets and game logic.

GAMING AI AGENT(Python, PyTorch, NumPy)

December 2025

- Built a competitive AI agent using A*, Monte Carlo Tree Search, and machine learning techniques, placing 20/99 in a tournament.
- Used NumPy, scikit-learn, and PyTorch to implement and train models for decision-making in a dynamic game environment.

MY WALLET APP (Java, Android Studio, XML)

October 2025

- Collaborated in a 4-person team using Agile sprints and Scrum meetings to design and build a finance management app featuring a budget tracker, expense log, and secure login functionality.
- Utilized GitHub for version control and team coordination throughout development..

PORTFOLIO WEBSITE (React, JavaScript, HTML, CSS)

July 2026

- Developed portfolio website using React95 a reactframe work based on Windows95.
- Includes a mock desktop with multiple apps and reactive windows using React, JavaScript, HTML, and CSS

APACHE NUTCH SOLR SEARCH ENGINE (Java, Python)

June 2026

- Using Apache Nutch and Solr created a program to measure performance of Nutch web crawler and paired Solr indexer
- Created working search engine using crawled data logs

LEADERSHIP AND COMMUNITY ENGAGEMENT

GT VG DEV CLUB (Game Development)

August 2024 – Present

- Collaborated across graphics, programming, and design teams to develop assets and features for student-led games.
- Developed on a variety of game engines including Unity and Godot in 3D and 2D.
- Ensured a smoother user experience by developing 2D assets for *Back to Basics*, *Hospital Days: Code GACHA*, and *Hypermania*, including character sprites and various UI assets.

GT GREYHAT (Cybersecurity)

August 2025 – Present

- Learned and worked on cybersecurity principles, as well as learned about cybersecurity competitions
- Participated in learning sessions and practices related to Capture the Flag (CTF) and other cybersecurity competitions.
